Email : juancruzginer@gmail.com

Phone : (+ 54) 11 5056-5642

EXPERIENCE

- **Universidad de San Andrés (UdeSA)** Argentina, Buenos Aires, Victoria (On-site)
Undergraduate Student Researcher Feb. 2026 - Present
 - **Applied LLM research:** Conducted research in collaboration with the ISI Foundation on optimizing information extraction methods for LLMs in humanitarian crisis reports, for training language models used by UNICEF.
- **Universidad de San Andrés (UdeSA)** Argentina, Buenos Aires, Victoria (On-site)
Teaching Assistant - AI Fundamentals Mar. 2026 - Present
 - **Assistant instructor:** Taught alongside professors at Universidad de San Andrés as a Teaching Assistant in the AI Fundamentals course.
- **Pulero & Rey Accounting Firm** Argentina (Home Office)
Automation Specialist (Part-time) Jun 2025 - Present
 - **Process automation software:** Developed software to automate internal workflows and operational processes for the accounting firm.

EDUCATION

- **Universidad de San Andrés (UdeSA)** Buenos Aires, Argentina
B.S. in Artificial Intelligence Engineering 2022 - 2027 (in progress)
 - **Relevant coursework:** Machine Learning, Computer Vision, CNNs, NLP, VAEs, Reinforcement Learning (RL), Networks, Data Structures and Algorithms, Probability and Statistics.
- **Colegio Santa María de Luján (SML)** Luján, Buenos Aires, Argentina
High School Diploma - Social Sciences Track Mar. 2017 - Dec. 2022
- **Cambridge English** International
B2 First Certificate Dec. 2022

PROJECTS

- **Computer Vision - U-Net Encoder-Decoder for Tissue Segmentation:** Implemented U-Net-based encoder-decoder architectures for tissue segmentation in radiographic images, focused on detecting cancerous tissue and improving overlap metrics (IoU / Dice).
- **Machine Learning - Education Level Prediction with Boosting Trees:** Implemented tree boosting methods to predict education level using INDEC census datasets, including data cleaning, feature engineering, model training, and evaluation.
- **Deep Learning - Japanese Character Recognition with Neural Networks:** Developed and optimized neural network classifiers to recognize and classify Japanese characters across 49 classes from 28×28 images.
- **Machine Learning - Breast Cancer Diagnosis with Logistic Regression:** Built a logistic regression model from scratch (NumPy/Pandas) to classify breast growths as benign or malignant using histopathology-derived variables.
- **Unsupervised Learning - Clustering and Dimensionality Reduction (K-means, GMM, DBSCAN, PCA):** Clustered synthetic datasets with K-means, Gaussian Mixture Models, and DBSCAN, and reduced dimensionality on MNIST with PCA and Autoencoders; final comparison included VAE-based reconstruction.

SKILLS

- **Proficient languages:** Python, Java, C.
- **Familiar languages:** C++, Haskell, JavaScript, HTML, CSS.
- **ML frameworks and libraries:** PyTorch, TensorFlow.
- **Game engines:** Unity, Unreal Engine, Godot.
